Bee on the lookout this spring

(NC) From minor irritations to severe allergic reactions, don't let bees and wasps be a buzz-kill this year. Bee- and wasp-proofing should start as soon as temperatures begin to rise, as colonies begin anew each spring.

"The most important element of wasp control is the prevention of future nests on your property," says Alice Sinia, PhD, a resident entomologist with Orkin Canada. "It is much easier to proactively prevent a single queen than to treat a colonized nest."

Wasps and bees like to nest in protected areas such as dense bushes, tree branches, fence lines, wall voids or under the eaves of

How to choose just the right colour for your rooms

are this year's secrets to décor colour choices.

change the look of a room," says Sally Morse, director of creative services for Hunter Douglas, a leading window treatment company, "is, of course, to do something fresh at the windows. But my second favourite way is to paint the walls a new colour and then accent it with complementary hues in different ways throughout the room."

That inviting idea may take more guidance that it sounds.

"The only trouble," Morse continues, "is that with dozens of variations of white alone and thousands of every other colour under the sun, it can be a daunting task to find the right ones, even for me." To help solve the mystery, she has devised four ways to conduct the search and shares them with you here:

Colour-right methods

If you wear a daz-"My favourite way to zling variety of hues, there is probably one that stands out, maybe a jewel tone, primary bright or pastel. If black, beige or white is most prominent, consider your shoes, hats, jewellery and scarves to find the shades you lean toward. Any of them, or lighter or darker versions, are good possibilities for the walls or as accents to a white-and-black decorating scheme or one composed of neutrals.

Look at nature: Do the soft tones of a beach in the summer - sand, sea foam green. blue sky and whitecaps - capture your fancy? Or perhaps autumn's rusts, browns, oranges and golds. Maybe it's winter's icy blues, silver, stark white and slate gray skies. Or spring with its blossomina of green, pink and buttery vellows. Don't assume it's mandatory to paint baseboards and trim white. The newest style is no baseboards or a smooth swath of one colour from ceiling to floor. This is not only on- trend, but it makes the ceiling feel higher.

Don't forget the ceilings. A soft rendition above you of the wall colours can dramatically change the entire room.

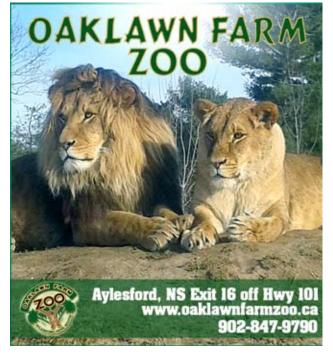

Don't choose wall colours that are too pale. When selecting the primary colour for an open-style home, choose a slightly darker one than you would for a small room.

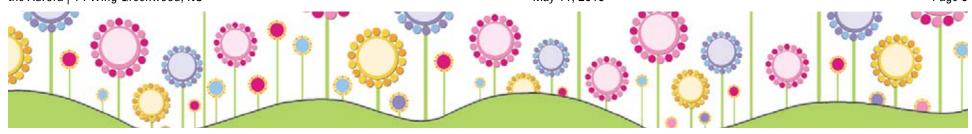

Don't forget the window treatments. "With windows being such a prominent feature in any room," counsels Morse, "it's important to figure out the best way to dress them. Fun By The Numbers

Here's How It Works: Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
